# IMPROVE YOUR FIBRE BLOWING

By the end of the Improve Your Fibre Blowing course, participants will have a comprehensive understanding of how fibre blowing operates, along with practical insights on troubleshooting and enhancing productivity through our expert guidance and mentorship.

## Course Agenda:

- What is blowing fibre?
- PPE & safety with compressed air
- Successful blowing - The influencing factors
- Blown fibre - what makes it different?
- Microduct - what to look for & what to avoid
- Air - The secret sauce of blowing fibre
- Choosing your blowing machinery
- Blowing set up - Increasing productivity
- Cleaning the microduct & range extension
- What is over blowing & how to do it successfully
- Why document your blowing?
- Maintaining your kit - why it makes sense
- Demonstration & hands on with the machines

Course Duration: 1 day (2-3hrs Classroom & 1-2hrs Practical)

Venue Requirements: Projector & screen for presentation. For practical we can advise.
